

Want to add value to your 14-19 diplomas and give pupils something extra to add to their CV?

The Schools eA suite of e-courses has been developed in partnership with businesses. Many of the modules cover key business skills and are often used as part of induction and mandatory training. A number of these modules are excellent support tools for the new 14-19 diplomas, especially as they need no extra teaching activity. Pupils can access these at a pace, place and time to suit themselves and get a Schools e-Academy certificate to add to their CV. Access to the full suite of School e-Academy modules is achieved by taking up school membership. Alternatively courses can be purchased on a single user basis.

Fire Safety

Working Safely in an Engineering

Safeguarding Children

## Interested in becoming a member?

If you want find out more about the Schools e-Academy then visit [www.schoolsea.co.uk](http://www.schoolsea.co.uk) or contact: Lesley Ord on **01943 605976**. We will set you up with an online demo and talk you through the membership options.

- No peer pressure
- Access 24/7

# The Virtual Work Experience

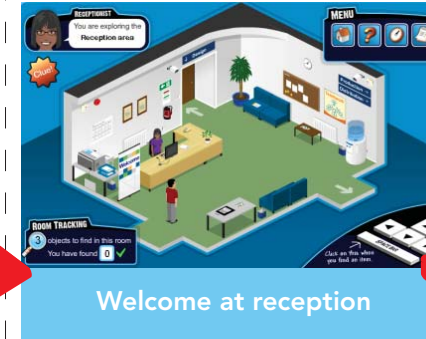

**Work experience** aims to help students understand what it might be like to work in a particular job. Our online virtual work experience tool is designed for specific sectors (currently Construction and Engineering) and allows students to collect learning objectives with activity sheets to utilise whilst on work experience, thereby making the most of their time in company. It also helps employers understand what the student needs to gain from their time with them.
